

OPEN-TOP TANK RENTAL

NewKota
Services & Rentals

SATISFACTION
100%
GUARANTEED

Incomparable performance

Our open-top tanks are manufactured to our specifications to achieve the highest operating efficiency available. Unique three-stage separation using two weirs, tandem 8-inch diffusers with 4-inch inlets, and 500bbl tank capacity assure greater flow rates and superior separation, without spillovers and washouts.

- Higher capacity 500bbl open-top tanks with 6-inch cushion of room
- Unique 3-stage separation using two weirs for optimal separation
- Velocity-reducing diffusers ensure no spillovers or washouts
- Versatile, multi-point suction system for cleanest fluid removal
- OSHA compliant design with many safety-integrated features
- Skid or axle mounted units available

Services you can trust

NewKota has earned a solid reputation for providing innovative, safe and efficient equipment rentals and services to the oil field industry. We take extreme pride and ownership in every project.
